Profile

As a Junior Full-Stack Developer with a strong foundation in Laravel, React, and modern web development practices, I specialize in building scalable, clean, and maintainable applications. My experience includes crafting microservices-based systems, RESTful and GraphQL APIs, and interactive frontend interfaces using React, TypeScript. I've worked on real-world platforms across domains such as e-commerce, healthcare management systems, and LMS-style educational products, often focusing on both backend logic and frontend user experience.

Professional Experience

Tuba

Full Time
2024/8 - Present
Cairo, Egypt

Full Stack

Working on a scalable web platform for medical insurance and health care providers system using Laravel and React (Frontend).
Using Curl and SDKs to interact with another services in frappe backend server
Building Dashboards with React ts , Tailwind , and material-ui
Collaborating closely with product and QA teams to ensure high-quality, production-ready code.

Qader -First step

Part Time
2025/02 – 2024/05
Remote

Backend Laravel Developer | First Step KSA

Developed the backend system using Laravel 11 for a platform connecting centers, parents, and nurseries in Saudi Arabia
Built real-time dashboards for centers and parents with live notifications and chat features using Pusher.
Generated dynamic PDF reports and built a custom Role-Based Access Control (RBAC) system supporting both admins and branch admins.
Designed scalable and secure RESTful APIs, optimized database structure, and ensured system performance and reliability

NajahNow

2023/07 – 2023/09
6th October,
Cairo , Hybrid

Position: Full Stack Intern, Junior
Technologies: Remote(Laravel backend, Flutter frontend)
As a Full Stack Intern at NajahNow, I was actively engaged in a hybrid development environment for 3 months 420 hours, contributing to both the backend and frontend aspects of our projects

2023/08 – 2023/09
Aswan

Software Engineer Trainee
ODC (Orange Digital Center)

2022/08 – 2022/08

ECPC 2022 Participating

- Proficient in C++ and Java
- Participating in the Egyptian Collegiate Programming Contest (ECPC) 2022, I honed

Education

2019/09 – 2024/08

Cairo

Bachelors Degree in Computer Engineering

Al-Azhar University

Faculty of Engineering, Systems and Computer Science Department

Projects

TUBA

React + Laravel | trytuba.com

Developed a professional landing page for Tuba, a full-stack Laravel and React-based SaaS product. Ensured clean UI, responsive design, and performance optimization.

Polybai LMS Platform

Laravel (Blade, Livewire) | polybai.com

Worked remotely as a freelance full-stack Laravel developer on an LMS (Learning Management System) platform. Built interactive features using Blade and Livewire, contributing to core functionalities like user management, course delivery, and dynamic UI components.

Learned Today — Personal Learning Tracker | NestJS · Next.js · MongoDB · Gemini AI

Link: [Learned Today](#) | **Gitub** :[FrontEndNext](#) | [BackendNest](#)

Integrates with **Gemini AI** to analyze logged entries and automatically recommend learning resources (e.g., articles, YouTube videos).

- Supports **tagging**, **progress tracking**, and **data visualization** to reflect on learning trends.
- Offers smart insights and content recommendations based on user-defined interests and behavior

First Step Project (KSA)

Laravel 11

Built key backend systems for a medical-education platform connecting parents and centers. Developed parent and center dashboards, real-time notifications and chat using Pusher, PDF reporting, and a custom RBAC system for multi-role access. | [First Step KSA](#)

Real-Time Chat App – Personal Project

Node.js, Express, Socket.io

Developed a private messaging system with real-time communication using Socket.io. Features include live typing indicators, message status, and direct messaging.
